Blakstad design tradition brand new villa for sale

A mere 10-minute drive from Ibiza, Santa Gertrudis, and San Juan takes you to a hilltop location with sweeping views of the surrounding landscape. This opulent villa, built in the Blakstad design tradition, spans 440 square meters and is set on an expansive 28,000-square-meter plot.

Blakstad combines the essence of classic Ibiza architectural practices with modern features and aesthetics. This melding of tradition and innovation results in residences that are both visually stunning and exceptionally well-built. In local architectural circles, the term "a Blakstad home" has come to signify a standard of beauty and quality that is unparalleled.

The villa features an open layout and large retractable doors that flood the space with natural light, creating an inviting atmosphere. As per the existing plans, the home will include five bedrooms, five bathrooms, a spacious 70-square-meter private pool, and abundant terrace areas for soaking up the sun throughout the day.

This high-end project has secured rare building permissions that are no longer readily available. It is currently in the construction phase, with a targeted completion date set for 2023.

Future owners have the option to tailor the interior layout to better suit their specific needs and preferences.
